

NETWORKING CABLES

CAT6 PATCH CABLE

CAT6 cable contains four pairs of copper wire and unlike CAT5, utilizes all four pairs. CAT6 supports Gigabit (1000 Mbps) Ethernet and supports communications at more than twice the speed of CAT5e, the other popular standard for Gigabit Ethernet cabling. Gold Plated 50u, 24AWG Stranded Round Snagless 'Ferari' Molding protects the RJ45 plastic tab from damage during installation.
