CUSTOM CABLE CAPABILITIES

Y.C. Cable products are designed & manufactured to suit the specific needs of our customers' applications. They are an integral part of the system & its performance. Advantages of a custom-engineered cable include being able to:

- Determine physical and electrical tolerances.
- Define the components (insulation, jackets, shield, etc.) that best fit your application.
- Optimize the conductor count, stranding, size, and color-code.

For these reasons, more and more people are relying on the products and services we provide for the total systems confidence they need.

Whatever the application, our in-house engineering team of compound, process and electronic engineers can design creative solutions to your specifications and needs. Y.C. Cable is dedicated to providing the finished look you desire and our inside sales engineers are committed to helping you reduce your product to market cycle time, consolidate your approved vendor lists, and limit your in-house inventory. We provide quality products and services...when you need them.

Please contact Y.C. Cable for a custom cable quote.
